## Develop and deploy new curricula and knowledge exchange practices relevant to bio-based systems

### European Commission

The scope of this call is that collaboration between university/higher education and industry is a necessary condition for innovation and essential for greater competitiveness of the circular bioeconomy sector(s). Besides technical/technological development, training and re/up/skilling of (future and present) bioeconomy professionals is essential. Key skills could include digital skills, biotech/biomanufacturing, environmental sustainability assessment and circularity, toxicology/risk assessment, ecodesign, and the safe-and-sustainable-by-design (SSbD) concept for bio-based products, business development, process development, etc. Soft skills and cross-sectoral skills remain an important aspect, as well as overall open-mindedness to new knowledge, points of view and cultural differences. The scope of this topic covers higher education, vocational training, and postgraduate and executive courses, as relevant for training students and reskilling and upskilling adult professionals, as needed for the emerging circular bio-based economy.

### Eligibility

- Any legal entity, regardless of its place of establishment, including legal entities from non-associated third countries or international organizations (including international European research organizations), is eligible to participate (whether it is eligible for funding or not).
- Countries associated with Horizon Europe.
- Low- and middle-income countries.

The award value for this call is around EUR 1000000.

The application deadline for this call is September 18, 2025.
